The CystoSure® Advantage
Now there is a fast, convenient way to conduct cystoscopy to evaluate bladder integrity and ureteral patency quickly and effectively. CystoSure® combines the familiarity of a urinary catheter with the functionality of a cystoscope into a singular product providing reliable and consistent results.

Developed by surgeons, CystoSure® enables easy and standardized cystoscopy in OR, patient bedside, and/or office settings.

Safe
- Single catheter placement
- Reduced perforation risk
- Rounded tip minimizes pain & irritation
- Reduced infection risk with scope passage
- Multiple scope passes without urethral trauma

Simple
- Female urethra specific
- Simple visualization of ureteral ostia
- Enables quick, simple CMG
- Cystoscopy in 1-2 minutes
- No assembly required

Standardized
- Perform multiple procedures
- Reliable & consistent cystoscopy
- Tip at the right place each and every time
- Full 360° Cystoscopy
CystoSure® Urinary Access System
Technical Specifications

CystoSure® Silicone Access Catheter

- Smooth rounded tip to eliminate irritation
- Drainage Funnel
- Patented Pancake Balloon
- Balloon Inflation Port (5cc luer slip syringe)
- Universal Irrigation (IV luer or cysto tubing)
- Sealed CystoSure® Scope Access Port
